VGA + USB KVM with Audio(4 Port)

Details correct on: 09/12/2014

Notification	
Product Code	KVM-634A
Short Description	4 port VGA KVM with audio and USB control
Full Description	The KVM CPU Switch Kit allows users access 4 IBM compatible computers from one USB keyboard, USB mouse and VGA/SVGA monitor. Switching between computers is easy as pressing the push button or entering hot-key commands from your keyboard. There is no interface card or software to install and it is independent of the computer operating system. Comes with audio ports to share sound from 4 computers. Ready to run right out the box, these kits come with everything you need – switch and complete cable sets, just hook them up and go. By allowing one console to manage all your computers, the KVM Switch Kits eliminate the expense for extra consoles, the space needed for extra peripherals and time spent accessing different computers. Rextron
